133" - 144"	\$269	359.00	\$379

add \$50 to House lot price for elliptical arches

### Manufactured Doors & Windows (see drawing)

- 1 – Hold tape measure across opening. Slowly move it up until the measurement decreases. Move the tape back down to the point where it returns to the original measurement. This is the point where the arch begins to curve. Mark this point.
- 2 – Measure the height from this point to the top centre of the opening. This measurement is the height of the arch.
- 3 – Add a reveal to the measurements. Add this once to the height and twice to the width (once for each side)

### Job Site Arch Openings

For any non-machined arches, trace your arch on heavy paper: Bristol board or cardboard. If arches are required for both sides of a doorway, please provide **two** well-labelled templates. This is important, as measurements are usually different on each side of a doorway.
